AVIATION WITH US**

WHO WILL TRAIN ME?

All of our flight instruction is provided by highly experienced, FAA-certified instructors. Upon enrollment, you will be assigned an instructor to guide you through your training. If at any point the instructor pairing does not meet your needs, we are happy to match you with another instructor to ensure the best possible learning experience.

HOW LONG DOES IT TAKE?

The time required to earn your pilot certificate depends on your individual schedule, availability, and level of commitment. Our FAA-approved curriculum is structured to allow students to complete their Private Pilot License in the minimum required time of 40 flight hours, while emphasizing safety, proficiency, and confidence in aircraft operation. Students who are able to fly approximately three times per week typically complete their flight training within three to four months.

IS IT SAFE?

Safety is a top priority at USAF Aero Clubs. Our programs operate to standards that exceed those of many civilian flight schools, supported by comprehensive safety management practices designed to protect our members. We maintain a strong safety culture through ongoing training, standardized procedures, and regular Aero Club safety meetings held every other month, which members are encouraged to attend.

DO I NEED INSURANCE?

Unlike many commercial flight schools, members are not required to obtain additional or specialized flight insurance. Coverage is automatically included as part of your membership, allowing you to focus on your training with confidence and peace of mind.

RATES

MONTHLY DUES \$30
BILLED ON THE 15TH OF EACH MONTH

AVAILABLE AIRCRAFT

FUEL INCLUDED

CESSNA 182T	\$195/HR.
